

GENU DYNASTAB

Stabilizing Knee brace with
Polycentric hinge

FEATURES & BENEFITS

COMFORT

- **Hyper-flexible knitted areas:**
Popliteal space, Patella, Thigh
- **Semi-Rounded, bi-lateral velcro Straps** for easy application
- **Pre-contoured uprights** provide anatomical fit
- **Hyper flexible, softer knit** on thigh, patellar & popliteal areas

SUPPORT

- **Polycentric hinge design** provides maximum stability
- **Rigid upright splints** provide lateral stability
- **Double Adjustable Velcro Tabs** optimizes placement of uprights
- **Semi-rigid strapping** gives extra support & prevents migration
- **Silicone ring** for patellar stabilization

SUSPENSION

- **Aggressive dual tab calf strap**, improves suspension
- **Integrated anti-slip silicone** located inside
- **Flexible knitting** improves mobility

PRACTICALITY

- **Flexible knitting** for easy application
- **Patented pull tabs** allow for easy application & removal
- **Sizes** covers knee circumferences 32 - 53 cm

Indications:

Functional treatment of sprains and their consequences
Support after surgery and during rehabilitation
Resumption of activities after sprains (sports, heavy occupations)
